ROeS 2027 Call for Invited Sessions

35th Conference of the Austro-Swiss Region (ROeS)

Augmenting Statistics:
Better and faster data-driven decisions

The conference of the Austro-Swiss Region (ROeS) will take place in Bern, Switzerland, 16th to 19th of August 2027.

We invite proposals for invited sessions on topics related to the conference theme '*Augmenting Statistics: Better and faster data-driven decisions.*' Invited sessions are ***100 minutes*** long and typically feature one invited speaker and three additional speakers presenting contributed talks. Possible session formats include

- One invited speaker (40 minutes), three additional speakers (20 minutes each)
- One invited speaker (40 minutes), two additional speakers (20 minutes each) and a discussant (20 minutes)
- One invited speaker (40 minutes), one additional speaker (20 min) followed by panel discussion involving the speakers and up to three additional panellists (40 min)
- One invited speaker (40 minutes) followed by contributed talks selected from submitted abstracts

The session organizer must confirm that all proposed speakers have agreed to participate. Once registration opens, all proposed speakers will be required to submit an abstract via the online submission system.

Please note the following conditions: a) each speaker can give *only one talk* at the conference (this restriction does not apply to discussants or panelists) b) the registration fees will be waived for the invited speaker only (not for additional speakers, discussants and panellists) c) speakers should represent different organizations.

The ROeS scientific committee reserves the right to give priority to fully planned invited sessions with all additional speakers nominated, over comparable proposals without nominated speakers.

If an invited session is not selected, it might be converted into a topic-contributed session. In this case, the session will be shortened to 80 minutes, and the invited talk to 20 minutes.

The ROeS organizers are committed to promoting diversity and inclusion in the scientific program. Please ensure that your proposal reflects this commitment by considering equitable geographical representation, gender balance, and diversity of career stages among the proposed speakers.

Please submit proposals using the online form available here. The form is also available at the conference website https://roes2027.org/ . Please note that only fully completed proposals

will be considered. For questions or technical assistance please contact organizers@roes2027.org .

Deadline: December 11, 2026

Notification of acceptance: December 23, 2026
