ROeS 2027 Call for Short Courses

35th Conference of the Austro-Swiss Region (ROeS)

Augmenting Statistics:
Better and faster data-driven decisions

The conference of the Austro-Swiss Region (ROeS) will take place in Bern, Switzerland, 16th – 19th of August 2027.

We invite proposals for half-day courses on topics related to the conference theme '*Augmenting Statistics: Better and faster data-driven decisions*'. Courses are typically delivered by a single instructor and may range from introductory sessions to advanced, specialized topics. Each course will consist of two 90-minute sessions and will take place on the morning of Monday 16th August, ahead of the start of the conference opening in the early afternoon.

Our aim is to offer a diverse and engaging program that appeals to a broad audience, particularly students and early career researchers, and covers a wide range of statistical methods and application areas.

Please submit your proposals via the online form, including the following details:

- Title of the course
- Course instructor
- Course description (including main topics and learning objectives; up to 350 words)
- Prerequisite knowledge (the knowledge participants are expected to have; up to 150 words)
- Maximum number of participants (optional)
- Relevance to ROeS 2027 participants (why the course would be of interest to conference participants; up to 300 words)
- Course format (lecture-based, hands-on, or a combination of both)

Short course instructors will receive the following benefits: waived registration fees, complimentary attendance at the conference dinner, reimbursement for one night of accommodation (up to CHF 150) and travel expenses (up to CHF 150/400/750 for Austria/Europe/Intercontinental).

The organisers reserve the right to cancel an accepted short course if registration numbers are insufficient. This decision will be made in May 2027, and the instructor will still be eligible to register for the conference at the early-bird rate.

The ROeS organizers are committed to promoting diversity and inclusion in the scientific program.
For questions or technical assistance, please contact organizers@roes2027.org.

Please note that only fully completed proposals will be considered. The form is also available at the conference website https://roes2027.org/.

Deadline: 11th of December 2026

Notification of acceptance: 23rd of Dec 2026
